EXPERIENCE

Accenture

September 21, 2021 – Present

Custom Software Engineer Associate

- Modernized application frameworks by leading the upgrade of Angular from v15 to v20 and Ionic from v4 to v8, resulting in improved performance, maintainability, and reduced technical debt across multiple projects.
- Designed and developed responsive UI components in Angular, ensuring seamless integration with RESTful APIs and backend services to deliver consistent experiences across web and mobile platforms.
- Collaborated with backend teams to implement and consume .NET Core APIs, contributing to full-stack features such as authentication, data management, and reporting modules.
- Conducted usability testing and user research, translating feedback into actionable design improvements that increased user satisfaction scores.
- Resolved and tracked application bugs through Azure DevOps, ensuring timely fixes that enhanced system stability and reliability.
- Created and managed IT service tickets in ServiceNow to track incidents and requests.
- Authored technical documentation for Angular components, API integration patterns, and deployment processes, enabling faster onboarding and smoother collaboration across cross-functional teams.
- Contributed to .NET framework enhancements by assisting in the development of backend modules, writing unit tests, and supporting API version upgrades to align with evolving business requirements.
- Implemented mobile build distribution automation using Azure Pipelines and Firebase CLI, enabling faster and more efficient delivery of builds to testers

EDUCATION

University of Nueva Caceres

June 2021

- Bachelor of Science in Information Technology

SKILLS

Frontend Development: • HTML • CSS • TypeScript • Angular • Responsive Design

Backend & Database Development: • .Net Framework • SQL Server

Cloud Computing: • AWS • Azure • Firebase

Development Tools: • Git • VS code • Visual Studio • Postman • Power Apps

AI Tools: • GitHub copilot • Claude Code • ChatGPT

Collaboration & Communication: • ServiceNow (Ticketing System) • Code Reviews • Technical Docs

OTHER

Certifications

- Scrum Foundation (2022)
- AWS Cloud Practitioner (2025)
- AWS Cloud Quest: Generative AI Practitioner Training (2026)

Professional Development

- Cloud computing
- Backend Development (.Net, node.js & SQL)

Leadership

- Served as a leader for the Hybrid Mobile App, providing knowledge transition, technical guidance, and hands-on training to team members to ensure smooth onboarding and consistent delivery.
